Period for Reply

## A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, applicant should clarify what is intended by “said composite green sheet having a conductor and at least one of *a first ceramic area and a second ceramic area formed in a region excluding a location where the conductor is provided.*”

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakazawa et al. [US 5,948,200].

Nakazawa et al. discloses a method of manufacturing laminated ceramic electronic component comprising the steps of:

- preparing a first transferring sheet including a composite green sheet supported by a first supporting film [figure 7], wherein the composite green sheet having a conductor and at least one of first ceramic area and second ceramic area;

Art Unit: 2832

- preparing a second transfer sheet [figure 1] including a ceramic green sheet supported by a second supporting film;

- a first transfer step [figure 8] of transferring the ceramic green sheet of at least one second transfer sheet on a lamination stage;

- a second transfer step [figure 10] of transferring the composite green sheet of at least one first transfer sheet on the at least one ceramic green sheet that was previously laminated;

- a third transfer step [figure 12] of transferring the ceramic green sheet of at least one second transfer sheet on the composite green sheet that was previously laminated; and

- firing a laminate obtained by the first, second and third transfer steps [see column 8, lines 167].
